APL 2010 LPA - Berlin
Array Processing Languages
Learn Parallel Applications

Dear Friends of APL and array processing languages,

Following the successful APL Berlin 2000 conference I am glad to forward to you the first announcement of APL2010 in Berlin from the chairman of the conference, Gerald Dittrich.

We would like to inform you that the global APL2010 conference is taking place again in Berlin from

13 to 16 September 2010
at the Technical University (TU)

The members of APL Germany and GSE Working Group APL will jointly organise and host this event supported by the GUIDE SHARE Europe (GSE) organisation.

The vendors of APL and array processing systems as well as array-oriented application software and their user groups will be invited to join the conference as sponsors, exhibitors, presenters and participants. Dyalog '10 is already scheduled for taking place integrated into APL2010 and the conference will be the only common meeting of GSE Working Group APL and APL Germany in 2010.

The program committee headed by Dieter Kilsch and Axel Holzmueller is organising the conference program and its publications. A call for papers will be sent out within a few days and the conference website is being created.

The conference will give you the opportunity to attend many interesting talks and to find interesting discussions with other participants. But Berlin is as well an excellent travel destination - as political and cultural capital of Germany – Land of Ideas!

Please reserve this date in your diary. The invitation to register will be sent out soon.

Could you please confirm by replying to interest@APL-germany.de that you are interested in the conference and would like to receive the registration documents. Please forward this information to everybody who might be interested!

We are looking forward to welcoming you next year in Berlin at APL2010!

Gerald Dittrich   Reiner Nussbaum
